

SAVANT

Relay Module w/ Three Aux Relays

CLI-AUX3-00

SKU: 159925 UPC: 728028292305

Create the ultimate custom comfort system and add more temperature sensors to any Savant Climate installation with this auxiliary relay module. Supporting up to three relays per module, these can be used to add additional relay controlled devices to any climate system, such as to add humidification, dehumidification, or extra zone dampers to turn single zones into multiple zones. For systems requiring more than three additional relays, simply add additional relay modules.
