

## Rack Mounted PDT Low Profile Vertical Power Strip, 20 Outlet

PDT-2020C-RN

SKU: 43020    UPC: 65674712978

The Middle Atlantic PDT-2020C-RN Thin Power Distribution Strip (20 Amp) offers an ideal power management solution inside a rack, taking up minimum space due to its small size. You are provided with enough room for plug-in power supplies via 20 well spaced outlets.

A J-box available at the bottom of the 20 Amp power strip conceals electrical connections from your sight and meets the code requirements in select areas. AC magnetic fields are eliminated via a 9' (2.74m) SignalSafe power cord compatible with NEMA 5-20p plug.

You can easily mount the power distribution strip via the included clips. Corrosion prevention is provided via a black anodized finish. Also provided are 2 stages of surge and spike protection, with remote status notification and LED status indicators.

### Features

- Optimum Space Utilization
