Wireless Door/Window Contact Brown Plastics

WS4945BN

SKU: 78540 UPC: 80008997

Regardless of the application, the compactly designed WS4945 wireless door/window contact should be every installer's first choice for tough-to-fit installations. The contact has become the new DSC standard for door/window contacts due to its streamlined profile (30% smaller than its predecessor the WLS925L-433/ WLS935L) and new design that allows for double-sided tape mounting. These features combine to help get you in and out of your jobs faster than ever before.

The WS4945 features a preinstalled battery that is activated by installers through a pull tab. This helps reduce installation time as casings don't need to be opened for battery insertion. Simply draw the activation pull tab and mount the contact. To help further simplify the installation process, DSC has placed the PCB on the contact's cover. If you prefer to mount the contact using screws (recommended when using the wall tamper option), the new design does not require the removal of the PCB to do so.

Feature

- Replaces the WLS925L-433/ WLS935L-433
- Small, compact design; 30% smaller than the WLS925L-433/ WLS935L-433
- Built-in reed switch
- Normally closed external contact input
- 1 lithium battery included
- Reliable 433 MHz and 868 MHz technology
- Available in brown housing
- Case and wall tamper
