## 28170 Z-Wave Plus Plug-in Wireless Smart Dimmer

28170

SKU: 177499    UPC: 03087828170

Easily enable Z-Wave control for a plug-in lamp without sacrificing a power outlet by using the Jasco Z-Wave Plus Plug-In Smart Dimmer Module, Dual Outlet (Gen5). This plug-in module has one Z-Wave controlled outlet that allows you to turn on/off and dim the plugged-in light through your Z-Wave controller, plus a traditional "always on" pass-through AC outlet that allows you to power another plug-in device. You can also control the Z-Wave controlled lamp with its traditional switch or using the button on the module.

### Features

- Polarized outlet – A polarized outlet is controlled remotely for enhanced home automation and matches the plug on most desk, table and floor lamps.
- Always-on outlet – A grounded outlet offers continuous power for enhanced plug-in options.
- Full-range dimmability – The dimmer adjusts brightness levels from 0-100 percent, which reduces energy costs and improves bulb life.
- Space-saving design – A sleek design with side-access outlet allows the dimmer to fit easily behind furniture while only occupying the top receptacle. It is also ideal for creating the perfect ambiance or providing ample task lighting.
- LED, CFL, incandescent and halogen – To retain the full benefit of LED, CFL, incandescent and halogen lights, the smart dimmer supports all types of dimmable light sources.
- Range extender – The dimmer repeats your Z-Wave signal from your hub or other Z-Wave device to extend your range by up to 150ft. Extended signal range increases your home automation coverage to enhance your control.
- Universal compatibility – Z-Wave Plus and all previous Z-Wave generations work together to allow continued expansion of your home-automation network.
- Zwave Hub required
- Indoor
- 120 Volts (AC)
- Metal
- 1 outlet can be controlled with Zwave and 1 outlet is a pass through outlet
- Smart Device
- Wireless (plug-in)
