

AFX Dolby Atmos Effects Speaker - Black

MOAFXBL

SKU: 155747 UPC: 810123021338

What makes the Motion Series sound so amazing? MartinLogan's dedicated in-house engineering team started by utilizing and refining the most advanced, compact technologies and combining them with innovative engineering. The result is an emotionally engaging sound that rivals (and most times trounces) traditional loudspeakers of similar size and price.

Features

- **Low Frequency Driver**
 - 5.25" (13.4cm) polypropylene cone with stamped steel basket
- **High Frequency Driver**
 - 0.75" (1.9cm) aluminum dome

- **Folded Motion Tweeters**

The signature Folded Motion tweeters utilize extremely low mass diaphragms that "squeeze" air, and require significantly less excursion than the typical 1-inch dome tweeter, which drastically minimizes distortion while providing a lightning fast response time. The increased surface area also provides a wide, yet controlled sound dispersion to create a realistic and carefully etched sound stage.

- **Immersive Dolby Atmos Experience**

Dolby Atmos delivers captivating sound that places and moves audio anywhere in the room, including overhead, to bring entertainment alive all around the audience. Whether you are listening to music, movies, television shows, or playing your favorite video games, Dolby Atmos delivers the full impact of the entertainment experience.

Each Motion AFX speaker features a 0.75-inch aluminum dome tweeter and 5.25" polypropylene cone bass/midrange driver with stamped steel basket, all incorporated into a beautiful High Gloss Black cabinet. The shape of the Motion AFX cabinet is specifically designed to angle the drivers towards the ceiling in order to accurately deliver a Dolby Atmos sound experience above the listeners.
