Maestro Motion Sensor Switch, 2 Amp, Single-Pole - Light Almond

MS-OPS2-LA

SKU: 33382 UPC: 27557982689

Let Lutron Maestro occupancy sensing switch turn the lights on and off for you. Its a simple, easy, and low cost way to save energy and add light automation to your home. Install a Maestro sensor and lights turn on when you enter the room, and then turn off automatically after you leave. This sensor Features xct sensing technology which detects minor motion, such as typing at a desk or reading, ensuring lights do not turn off inadvertently. Equipped with ambient light detection, you can customize your sensor to detect daylight so lights dont turn on with enough natural light in your room. Keeping the sleek design of the Maestro family, Lutron sensors will match the decor of any room in your home. Install it in the laundry room for added convenience when your hands are full, or in the kids rooms and never worry about lights being left on by mistake. Maestro sensors Works with any Bulb type, including cfls and LEDs. This switch can also be easily programmed to function as a vacancy (manual-on) sensor. Click on "watch the demo" under the product image to learn how to customize the settings of your sensor and for other helpful videos.
