## Shock Sensor with Pulse Count

SS-102

SKU: 78491    UPC: 88030047

DSC shock sensors, SS-101 and SS-102, have the ability to detect and analyze seismic vibrations caused by attempted break-ins before the intruder is able to enter the premise. These sensors are ideal for residential, commercial, government buildings and financial facilities. They feature a unique bi-colored LED to indicate minor or major attacks, full anti-tamper protection, a moisture resistant electronics module, and an analyzer that enables sensitivity adjustment of the sensors. Both sensors have a high immunity to low-frequency false alarms and radio interference and are compatible with all makes of control panels. The SS-102 is able to monitor for minor vibrations (and count them to a preset limit) and for major attacks at the same time.

### Feature

- Unique bi-colored LED to indicate minor or major attacks
- Anti-tamper protection
- Moisture-resistant electronics module
- Sensitivity adjustment
- High immunity to low-frequency false alarms and radio interference
- Compatible with all makes of control panels
- SS -102 is able to monitor for minor vibrations (and count them to a preset limit) and for major attacks at the same time
