

IQ Wireless Temperature Sensor

QS5535-840

SKU: 71937 UPC: 857497008268

The IQ Temp is two encrypted sensors combined into a single unit. Sending a signal to the panel if temperatures rise above 100° F or below 40° F you'll know if there is a problem before it becomes a disaster.

Features

- Encrypted sensor technology
- Freeze detection alerts panel if temp drops below 40° F
- High temp sensor alerts panel if temperature exceeds 100° F
- Great to detect HVAC failure
- Protect elderly, infirm, and pets.
- Get a text notification sent to your phone if the IQ Temp detects a potential problem

Low Temp and High Temp Warning:	
Low Temp alarm	Temperature drops below 40F, restores when temperatures rises above 45F
High Temp alarm	Temperature rises above 100F, restores when temperature drops below 95F
Sensor	Cover tamper Unique ID for each function Temperature check every 5 minutes Battery checked every hour
Batteries	Panasonic CR2032 Energizer CR2032 Duracell DL2032
