

12" 2-Way Multipurpose Nearfield Horn Speaker System 90° Conical

FS12T-BT60

SKU: 77914 UPC: 612079660704

The FS12T-BT60 is two-way, full-range speaker system engineered for nearfield applications while providing excellent voice and music reproduction. It was designed to withstand exposure to environmental conditions and provide long-lasting reliability.

It incorporates a 12" LF driver and 1" HF driver concentrically mounted to a high-directivity waveguide. It provides 90° conical coverage and is tuned for optimal source reproduction.

The unit is constructed using molded linear low-density polyethylene (LLDPE), creating an incredibly strong yet lightweight enclosure. The unit includes a stainless steel U-bracket and fly-points allowing for easy mounting. Input is via an integrated 70.7V transformer with low insertion loss and full frequency response with power taps up to 200-watts including an 8 Ω bypass. The transformer is discretely mounted under the rear cover for weather protection. The finish is neutral "battle ship grey" that is UV resistant and allows for years of durability.

Features

- All-Weather Construction Ensures Long-Term Reliability Through Varying Seasons
- 200 Watts Power Handling
- Constant Directivity Design Offers Controlled Coverage of 60° Conical (2kHz Octave Band)
- Driver Compliment Includes 12" Cast Frame Woofer with a Concentrically Mounted 1" HF Driver
- Easy, Weather Resistant Connection via a Convenient Recessed Terminal Block Located on the Back of the Loudspeaker
- Includes a Built-In, High Efficiency 200 Watt 70.7V Transformer
- Four Eyebolt Inserts for Multiple Mounting Capabilities
- Heavy Duty Mounting Bracket (Included) Allows for Easy Installation to Most Any Flat Surface
- Easy Service Design Allows Transducers to be Serviced in the Field without Uninstalling the Enclosure from the Mount
