Wireless Asset Protection Sensor - Gray

5870API-GY

SKU: 169914 UPC: 781410840577

Honeywell Home 5870API is a wireless asset protection device designed to guard against theft. It easily affixes to any valuable requiring protection within a home or business, including paintings, flat screens and other electronics, family heirlooms, safes, machinery, equipment and more.

The 5870API is an ideal solution for early warning notification or alarm verification. The 5870API uses patented Micro-Electro-Mechanical System (MEMS) Accelerometer technology, which senses acceleration in the X and Y axis. When affixed to the protected asset, the device will trigger a “detect” if an attempt is made to move or disturb the asset.

The 5870API is intended for use with Honeywell Home alarm systems that support 5800 Series wireless devices. The transmitter is fully supervised and can send alarm, tamper, trouble and low battery conditions to the alarm control panel.

Features

- Patented Micro-Electro-Mechanical Systems (MEMS) Accelerometer - The 5870API is capable of detecting when an asset is being moved in three distinct modes.
- Dual Tamper Protection - The 5870API has both front case cover and rear tamper protection. If attempt is made to remove the front case cover, the internal tamper switch will send a tamper condition. The same tamper switch will protect against removal from the asset (rear tamper protection).
- Full Supervision - The 5870API is fully supervised to monitor for low battery, tamper (front case cover and removal from asset) and trouble conditions.
- Installer Walk Test Mode
