

Single-Gang Low Voltage Mounting Brackets for New Construction

LVH1

SKU: 44479 UPC: 1899710979

LVH1 Bracket Mount your wall plates vertically or horizontally with Arlingtons LVH1. These non-metallic brackets are ideal for any Class 2 low voltage cable run including AV and networking applications. Designed for new construction, they attach easily to any standard wood or metal stud. With three mounting hole options, these brackets can be oriented in nearly any position with a minimum of adjustment and no increase in installation time. Sturdy side tabs also help stabilize the bracket against the stud, allowing for a secure assembly. The LVH1 is compatible with any single gang low voltage wall plate including bulk pass-through, keystone, and even decora-style faceplates. They include a molded tie-off slot for your pre-wiring cabling runs. This bracket is for use with low voltage wiring only and is not compatible with electrical runs.

Basic Information:	
Part Number	LVH1
Description	Low Voltage Mounting Brackets for New Construction
UPC	018997109798
Unit Packaging	50pcs
Standard Packaging	50pcs
Country of Origin	
Listing	
Physical Information:	
Weight	0.056 lbs/each
Color	Black
Material(s)	Plastic
Technical Information:	
Line Drawing	LVH1 Line Drawing
Style	Single-Gang Low-Voltage Mounting Bracket with Wire Tie-Off
Trade Size	N/A
Usage	For Mounting Low-Voltage Products on Wood or Metal Studs
