IQ Wireless Temperature Sensor

QS5515-840

SKU: 59152   UPC: 99101239

Receive alerts for severe temperature changes with the Qolsys IQ Wireless Temperature Sensor (AKA the IQ Temp). Used with any compatible control panel/receiver (319.5 MHz wireless frequency), such as a GE/Interlogix Panel (NetworX, Simon, etc.) or a Qolsys IQ Panel, this wireless, battery-powered sensor checks the ambient temperature every 5 minutes to monitor for high (~100 degrees F) or low (~40 degrees F) temperatures, depending on your monitoring preference. When the temperature threshold is breached, an alert is triggered. Its perfect for detecting HVAC failure or for protecting pets, elderly loved ones, valuables, and more.

Features:

- Freeze detection alerts panel is temp drops below 40 degrees F
- High temperature detection alerts panel if temp exceeds 100 degrees F
- Checks temperature every 5 minutes and battery every 1 hour
- Compatible with 319.5 MHz wireless panels, such as GE/Interlogix or Qolsys IQ
- Wireless range up to 600 feet from panel
- Battery-powered, no wiring required
- Easily mounts with included adhesive

Battery	3V Lithium (x2) included
Battery Life	8-10 years
Transmitter Frequency	319.5 MHz
Wireless Signal Range	600 feet (200 m), open air
Code Outputs	tamper, tamper restore, alarm, alarm restore, low battery. Unique code ID.
Approvals	FCC, IC
Warranty	1-Year Limited
