

AR 20A Prestige Voltage Regulator/Power Conditioner

P-2400 AR

SKU: 61053 UPC: 654061028192

The P-2400 AR accepts input voltage between 97V-137V and transforms it to a constant output of 120V, $\pm 5V$. Voltages beyond that range may also be converted to usable levels, depending on the range variance. With its robust 20A capacity, the P-2400 AR is ideal for high-current equipment such as power amplifiers or powering A/V racks in large installations.

Additionally, the P-2400 AR is a full-featured power conditioner that filters and purifies AC power, reducing line noise and ensuring optimum performance. Not only will your equipment perform better with Furman's Linear Filtering Technology (LiFT), but it will also be fully protected by our exclusive Series Multi-Stage Protection (SMP) and Extreme Voltage Shutdown (EVS). This circuitry provides the highest level of power protection available.
