IQ WiFi EasyMesh Router

QW8200-840

SKU: 171304   UPC: 00857497008541

IQ WiFi is a mesh Wi-Fi Router system used to connect Wi-Fi devices such as cameras and Touchscreens inside a home or business.

Great Coverage

Get the bandwidth you pay for, everywhere. Replace the existing router with IQ WiFi and add up to 7 additional "Satellites to blanket your site with reliable connectivity for all your Wi-Fi devices. Each unit covers approximately 1500 sq ft so you can cover almost any home or small business.

Mesh network

Place around your site to create a reliable mesh network that easily expands as you add up to 7 satellites. Fill in "Wi-Fi dead spots and fix troublesome gaps in service

Automatic Handoff & Self Healing

If Wi-Fi devices are moved, the mesh network automatically passes connectivity to the closest satellite to provide the best, most reliable connectivity. If connectivity is lost on one satellite the others will maintain the connection while it automatically fixes the problem in the background

Easy installation

Using the IQ Panel's on-screen wizard you can easily connect and configure the primary router and secondary satellites, create primary and guest networks, and manage connectivity and devices.

Feature

- Dual Band (2.4 GHz & 5 GHz)
- Add up to 8 nodes (1 controller & 7 agents)
- Expand current Wi-Fi network or create a parallel network
- Assign devices to specific node

- Gigabit Ethernet - 1X LAN/1X WAN
- WPA2 Security
- Dual Band 2.4GHz/5GHz - AC1200
- DHCP - Server/Client
- WPS Button
- Guest Network
- 4 Internal Wi-Fi antennas
- 12VDC, 1A Power Supply
- Dimensions - 150mm x 89mm x 57mm
- Weight - 172g
- Operating Temperature 0° - 40°
