SmartSensor for doors and windows (2-Pack)

EB-DWSHM2PK-01

SKU: 172583    UPC: 62798802300

Secure your home's doors and windows with contact sensors that monitor entry and motion. \*Monitoring requires an ecobee Haven subscription.

#### Feature

- **Smart Notifications**

With ecobee Haven, SmartSensor sends alerts and notifications when doors and windows are opened or closed and its motion and occupancy sensor alerts you to in-home activity detected when you're away.

- **Automatic Monitoring**

Ease of use meets peace of mind. ecobee Haven's Automatic Monitoring feature uses family members' and registered guests' smartphone locations to arm and disarm the system automatically.

- **Pause when door or window is open**

Save money and reduce energy waste, automatically. If an entryway with a contact sensor is left open for 5 minutes, your HVAC system will turn off and notify you. Once the door or window has been closed for 30 seconds, the heating or cooling will come back on automatically.
