

37 Space WR Series Roll Out Rack in Steel Enclosure, 42" Deep

WR-37-42

SKU: 69414 UPC: 65674710288

Middle Atlantic's WR-37-42 is a 37RU, 42" deep WR Series roll-out rack designed to provide rear access for equipment even when the equipment bays are placed up against a wall or back to back. Factory-assembled in its own host enclosure, the rack frame pulls out and rotates for service access. This rack system is well-suited for when easy access to rear equipment connections is required for larger audio, video and security equipment installations but an access aisle is not practical.

Features

- Host enclosure can be pre-installed on-site
- Detachable rack frame can be integrated with equipment and tested off-site
- Requires no additional accessories to roll out and rotate
- Engineered ventilation is optimized for passive thermal management
- Rack frame features built-in cable management tie points
- 4" laser knockouts provided for cable pass-through and ganging multiple racks
- Standard front and rear 10-32 threaded rackrail with marked spaces

Finish	Textured black powder coat
Material	Steel
Rackrail Type	10-32
UL Load Capacity	750 lbs
Usable Depth	36"
Usable Height	64.75"
