

Motion Series CI 6.5" Angled In-Ceiling Speaker

MC6-HT

SKU: 169776 UPC: 810123025589

The MC6-HT is the angled version of the MC6. By designing the speaker with a fixed tweeter and woofer angle, MartinLogan was able to tune the performance of the speaker far more accurately than universal pivoting designs. By eliminating the variable of tweeter and woofer angle, the precision Vojtko crossover network has been tuned for more accurate and predictable results. The MC6-HT is recommended for applications where the listener will spend most of their time not directly underneath the speaker.

Features

- Folded Motion Tweeter
- Woven Fiberglass Cone
- Spring-Loaded Binding Posts
- Micro-Perforated Grilles
- Proprietary Vojtko Crossover Networks
- Hand-Selected Components
