

Caseta Wireless In-Wall Switch - Black

PD-6ANS-BL

SKU: 58419 UPC: 784276152839

Experience the ultimate convenience in lighting control with Lutron family of Casita wireless dimmers, switches, and smart phone control. The Casita wireless in-wall switch provides switching of multiple load types and, when paired with Pico remote controls, allows remote control from anywhere in the space. Use the Pico remote control either in your hand, on a tabletop pedestal or by mounting the remote directly to the wall (remote control and accessories sold separately). you can even use the Pico remote to control the lights from your car as you arrive home. This switch works with up to 720 watts of incandescent, halogen, Elva and mlv, 6 amps of dimmable LED/CFL and 3. 6 amps of general purpose fans. Neutral wire required. Coordinating wall plate sold separately.

Features:

- **PEACE OF MIND:** Set lights to automatically adjust with changing seasons so your family always comes back to a welllit home; you can also enable the Smart Away feature to randomly turn your lights on and off to look like you're home even if you're away (smart bridge, LBDG2WH, required)
- **MOST CONNECTED:** Caseta connects with more leading smart home devices – including Amazon Alexa, Apple HomeKit, the Google Assistant, Serena shades and Sonos – than any other smart lighting control brand (smart bridge required)
- **CONTROL YOUR WAY:** Caseta puts the smarts in the switch so you can control your lights a variety of ways – via the free Lutron app, your voice, or from the wall You can create personalized schedules to turn lights on/off at set times to best fit your everyday routines, or activate favorite lighting scenes with the touch of a button (smart bridge required)
- **GET MORE, SPEND LESS:** One Caseta smart switch can control many bulbs at once; make many bulbs smart, even your existing bulbs Get smart control of multiple styles of LED, incandescent, and halogen bulbs
- **WIRELESS REMOTE CONTROL:** For added convenience, use with the wireless Pico remote (PJ22BGXXL01) to turn your lights on/off with the touch of a button from anywhere in the home
- **EASY 3WAY SETUP:** With a Pico remote and wall mount bracket, create a 3way by mounting the Pico to almost any wall surface without cutting holes or pulling wire You can also replace existing 3way switches by mounting the bracket and Pico over the backbox (Pico remote and PICOWBXADAPT sold separately)
- **TECHNICAL DETAILS:** Works with up to 720W incandescent/halogen/ELC/MLV, 6A of LED/CFL or 36A of ceiling or exhaust fans
