

# AC INFINITY

Flexible Four-Layer 8" Duct Tube - 25" Long

AI-DTA8

SKU: 173238    UPC: 819137020375

**AC Infinity AI-DTA8 Flexible Four-Layer 8" Duct Tube - 25" Long** is designed for various ventilation, circulation, and heating/cooling transfer applications. It features four-layer protection, making it more durable and resistant to leaks than single-layer designs. The internal layer is made of heavy-duty dual aluminum foil that is fire/flame resistant. Its outer layer utilizes dual PVC thermoplastic that protects the aluminum from cuts and tears while stopping leakage. Each duct tube is held together by an internal steel-wire spiral that is flexible and easy to install in hard to reach places. The ducting can be shortened by cutting the tube to fit various applications. Includes two stainless steel duct clamps.

## Features:

- Four layer design makes it more durable and resistant to leaks, tears, and cuts.
- Steel-wire spiral structure is flexible and easy-to-install in hard to reach places.
- Constructed of Aluminum and thermoplastic, tube can be shortened for various applications.
- Ducting Size: 8 | Length: 25 feet | Includes two stainless steel 8" duct clamps

## Specifications:

- Product Dimensions
  - Ducting Size: 8 ft. (20.3 cm)
  - Length: 300 in. (25 ft)
- Product Performance and Technical Specs
  - Outer Layer: PVC Thermoplastic
  - Inner Material: Aluminum Foil
  - Internal Structure: Spiral Steel-Wire
