SCP Cat6 Enhanced 550 MHz 23 AWG Solid UTP ETL Category Cable

SCPs Category 6 (Cat6) UTP (unshielded twisted pair) cables are manufactured and tested to meet TIA/EIA 568-C.2 Category 6 and ISO/IEC 11801 Ed2 Class E standards. SCP Cat6 cables provide higher performance and headroom than Cat5e and feature more stringent specifications for crosstalk and system noise.

Each Cat6 UTP cable is performance optimized with 4 balanced twisted pairs on 23 AWG insulated solid bare copper conductors. Each pair is separated by a center spline. SCP Cat6 UTP cables are constructed to create a round and flexible cable for easy pulling and stripping of the PVC jacket.

All Cat6 UTP cables are packaged in our award winning Pull Box with guaranteed tangle free pulling.

Features

- Category 6 Cable
- Enhanced 550 MHz
- 23 AWG Solid BC
- 4-Pair UTP
- PVC Jacket
- ETL CMR / FT4
- 1000' Box
