Designer Dual Blink-IR Emitter - 10 Pack

286D10P

SKU: 44959 UPC: 4277731556

The 286D Dual Blink-IR Designer Emitter contains small infrared LEDs housed in a miniature, designer styled, black appearing, injection molded plastic shell. Unlike other emitters, the 286D emits visible red light in addition to IR control signals when activated by IR commands sent to it by IR receivers or other Xantech controllers. The emitters of the 286D are wired in series and are designed to be installed directly on the IR sensor windows of the controlled components.

Features

- Two emitters in series with each other and terminated in a single 3.5mm mono mini plug
- Length of wire: 7 to junction, 3 to each emitter
- Visible, high output version
