Universal Plug-In Wall Transformer 16V
40 Va

UB1640W-L6

SKU: 70921 UPC: 806593718014

Transformer Input: 120VAC 60Hz 0.48A Output: 16.5VAC 40VA

We are pleased to announce our new plug-in transformers that meet the requirements and are in compliance with the Department of Energy (DOE) 2014 Final Rule originally published in 2012. This rule requires that all external power supplies/plug-in transformers ("EPS") up to 250 Watts AC to AC with single and multiple outputs meet or exceed energy efficiency requirements in active mode. As a result of complying with the Level VI requirements the new transformers will no longer have LEDs for status and the resettable feature.
