

12 Space CWR Series Cabling Wall Mount Rack w/ Plexi Front Door

CWR-12-26PD4

SKU: 66981 UPC: 65674711286

The CWR Series 12-26PD4 Cabling Wall Mount Rack with deep plexi front door from Middle Atlantic is a 26" wide cabinet designed for accommodating rack equipment and cable installation. A wide-face rackrail comes standard in the cabinet and is set back 4", from the door, leaving room for cable management. Tapped with mounting holes and electrical knockouts, as well as featuring 4 d-rings, the rail is designed to provide easy and convenient installation of your equipment. The rack door can be installed as either left or right hand swinging and can be locked and latched for security. The deep door leaves room for additional front cabling before reaching the rackrail. The swing open center section allows for accessing your equipment from the front or rear, and the back panel has a 12½" x 12½", cut-out for installing an electrical pull-box.
