

35-Watt Single Gang Attenuator - White

AT35D

SKU: 25107 UPC: 612079180592

Decora style High-quality auto transformer series provides the advantages of excellent frequency response, low insertion loss and reliable performance for volume control application in 25 and 70.7-volt systems. Attenuation is accomplished in ten make before break steps plus positive off position. (No stop between maximum and off position to prevent switch damage). Contacts are silver plated for noise-free operation. Features a removable terminal block, and come complete with white and ivory plastic plates with matching skirted knobs.

The AT35D from Atlas is a high-quality wall mount attenuator that can handle up to 35W. The skirted knob allows you to make adjustments in 3dB steps for precise control over a system. The plastic decora finish is simple and discreet, allowing it to be installed virtually anywhere. AT Decora series includes white and ivory Decora style plastic plates with matching skirted knobs.
