

120-Watt Bluetooth-Enabled Mixer/Amplifier

VMA1120

SKU: 87381 UPC: 691991004414

The JBL VMA1120 is a Commercial Series Bluetooth-enabled mixer/amplifier designed to provide flexible multi-source mixing and amplification for installation in restaurants educational institutions fitness centers and retail stores. It features a 5-in/1-out mixer and 120W of output power. It can be installed in a standard 19" equipment rack with the supplied rackmount kit or set on a surface such as a desk or ledge.

Stream music wirelessly via Bluetooth or connect a USB drive to the front-panel USB Type-A port. Route other sources via Euroblock RCA and 1/4" input jacks. The integrated mixer offers level controls as well as bass and treble for each channel. Routing to the Euroblock outputs is configurable. The VMA1120 supports voice-activated ducking and priority muting. The front-panel controls and display make operation easy and remote volume control is possible via a JBL CSR-V module and a standard Ethernet cable (both available separately).

Features:

- Suitable for commercial and industrial use
- Euroblock RCA and 1/4" TRS input connectors
- Independent bass and treble controls for each output channel
- Voice-activated ducking during announcements
- Remote volume control capability using optional JBL CSR-V module and Cat5e cable with RJ45 connectors
- Priority muting using PTT switch closure
- Configurable output routing
- Barrier block output connections to drive 8 Ohms 70V or 100V speaker systems
- Media player capable of playing MP3 files from a Bluetooth device or USB drive
