

## Recessed Pro-Power Kit - White

45-0028-WH

SKU: 43081    UPC: 660559011645

DataComm Electronics Recessed Pro-Power Kit with Duplex Surge Suppressor and Straight Blade Inlet is used to install power and low voltage cables behind your HDTV, your amplifier or other audio/video devices. Power relocation kit allows you to pass low voltage cables and power with surge protection through the wall, creating a professional, clean look for every home theater.

### Features:

- Works with the industry the thinnest mounts and HDTV
- Conceal multiple low voltage cables behind your HDTV
- Metal mounting wings are attached to the media plate and fasten tightly against the back of the wall. No low voltage mounting plate necessary
- Flexible screen closes the interior opening of the Mid-Size Plate and Straight Blade Inlet (see picture to right)
- Female end of extension cord is recessed completely into the wall when plugged into the Straight Blade Inlet
- Male end of extension cord has a 360° rotating flat head for easy access to any outlet
