

ProControl.

Z-Wave Extender

11-500036-16

SKU: 64623 UPC: 11-500036-16

The Pro.zwi Z-Wave interface enables simple and cost-effective monitoring and control of Z-Wave enabled systems and devices via a Pro Control Z Series system.

For the ultimate in home automation, Pro Control provides easy management of the lighting in and around a home. Enjoy the convenience of intuitive control from Pro Control remotes or iOS interfaces. Experience the added security and energy savings of automated lighting and event-based control that requires no interaction at all.

Feature

- Wireless control and monitoring of Z-Wave lighting devices via the Pro Control system.
- Certified as a Z-Wave Plus product, ensuring seamless interoperability with Z-Wave devices.
- Compatible with a broad range of Z-Wave certified electronics including door locks, security, devices, window shades, thermostats and more.
- Expandable and scalable system allows control of more than 200 devices.
- Programmed using Pro Control Studio software.
- Powered via PoE (Power over Ethernet) or included power supply.
- Can be used as secondary or primary controller.
- Functional only in the USA
