

## PROFICIENT.

All-Weather 4" Outdoor Landscape Speaker (70V / 8 Ohm)

PAS-AW-LS-4

SKU: 173693    UPC: 66425403124

Proficient Signature Landscape Speakers deliver the exceptional indoor audio experience to outdoor locations. Featuring UV stable fiberglass-reinforced ABS enclosures and weatherproof acoustic components, the landscape speakers are built to last, able to withstand even the harshest of climates. The compact form factor of the 4" or 6" satellite speakers blend seamlessly into any outdoor space. [\\*\\*Ground stake](#) is sold separately.

### Features

- **DURABLE WEATHERPROOF DESIGN** – Weatherproof fiberglass reinforced ABS enclosures are rugged, ensure years of reliable performance and are no match for weed whackers and other outdoor lawn equipment.
- **NICKEL-PLATED BRASS FITTINGS** – We've addressed a common failure point among other landscape speakers by relying on solid brass fittings that are then nickel plated rather than plastic.
- **ADJUSTABLE VOLUME CONTROL** – Need it louder near the pool but quieter near your eating area? No problem! Control the volume of each speaker individually by adjusting the tap switch settings on the back of each speaker (70V/100V mode only).
- **BETTER COVERAGE** – 110-degree wide dispersion ensure outdoor filling sound with better coverage than a traditional speaker.
- **MOUNTING OPTIONS** – Quick connect accessories, sold separately, make ground, surface and conduit mounting easy and reliable.

### Specifications

- Woofer: 4" (100mm) Polypropylene Cone with NBR Surround
- Tweeter: 3/4" (20mm) Aluminum Dome Tweeter
- Enclosure: Weather-Resistant Fiberglass-Reinforced ABS Enclosure
- Sensitivity: 84dB
- Frequency Response +/- 3dB: 110Hz-20kHz
- Power Handling: Up to 120W Up to 90W
- Nominal Impedance: 8 ohms (in Bypass Mode)
- Tap Settings: 70V/100V: 3.75W (70V only), 7.5W, 15W, 30W, 8 Ohm (Bypass)
