

## 125W Multi-Mount Universal DC Power Distribution

PD-DC-125R

SKU: 61338    UPC: 65674725836

Eliminate wall warts and other power clutter in your AV, networking or security installations with DC power distribution, the perfect universal power solution for most DC powered devices like extenders, scalars, converters, and media players. With flexible mounting options, DC power distribution can be placed within typical rack units, small enclosures or wall boxes. This space-saving solution is intuitive to install with a color-coded screw terminal connector platform and polarity labeling. Utilize DC power distribution to streamline your install by allowing leads to be trimmed to length and by reducing design modifications contributing to additional labor costs.

### Features

- Multiple voltage outputs of 5 V, 12 V, 18 V, and 24 V supported in a single box form factor
- Color-coded screw terminal connectors with industry standard voltages and polarity labeling for easy identification
- Reliable multi-level protection on both AC input and DC outputs
- USB ports provided to conveniently power compatible products
- LED indicator lights show activity on each output and alert maximum capacity on each voltage bank

AC Voltage Input	120V
Volts DC	5V 12V 18V and 24V
Watts	125 W
Amps	10
Cord Length	6'
Depth	7.26"
Height	1.75"
Width	16.13"
Multi-Mount	Yes
Outlet Count	24
Plug Type	NEMA-5-15P
Power Cord	US Cord
