RCC 1000 Subwoofer Amplifier

RCC1000-SA

SKU: 74115 UPC: 827531002590

The RCC1000 Subwoofer Amplifier is a powerful Class D amplifier that delivers 1, 000 watts of output specifically engineered with advanced DSP software to power the RCC320 and RCC640 series In-Wall Subwoofers. Each RCC1000-SA drives two RCC320 or one RCC640 subwoofer.

Features

- 1, 000 watts of power for even the most demanding systems
- The RCC1000-SA is designed with preset DSP for the RCC in wall subwoofer series
- Powers up to 1 RCC640 or 2 RCC320 modules
- Preset equalization curves for a flat frequency response
- Compact 1 RU rack mountable form factor
- Machined minimalist aluminum front panel with setup adjustments on rear panel
- Balanced input and RCA inputs with cascade output for multiple amplifiers
- Multiple adjustments allow you to fine tune the system
- Large gold plated binding terminals for a secure connection
- Rack Ears included
