Waterproof Outdoor Contact Transmitter

5816OD

SKU: 62256 UPC: 781410985391

Honeywells robust 5816OD is a weatherproof waterresistant outdoor wireless transmitter that provides excellent detection and performance in extreme temperatures. It operates in temperatures from -40°F to 150°F (-40°C to +66°C) (100% RH). The 5816OD also contains two unique zones. The first loop is a normally closed circuit contact that can have external devices wired directly to it. The second loop is a built-in magnetic reed switch that can be used to protect gates sheds detached garages or any other outdoor area with an exit/entry point. It is also an ideal way to protect outdoor equipment when using outdoor rated magnetic pull apart contacts. With its dark gray housing the 5816OD blends well with most outdoor surroundings and can be custom-painted to match its mounting surface.

Features

- Weather-proof and water-resistant housing makes it ideal for harsh outdoor climates -40° F to 150° F (-40° C to +66° C) (100% RH)
- Maximum magnet gap 1.75" on wood vinyl and non-metallic surfaces and 1.25" on steel to facilitate easier installation
- Two long life AA lithium batteries easily replaceable
- Built-in reed switch contact loop
- Built-in wired closed contact loop (for use with external devices)
- Tamper protection-removal of front cover and transmitter from mounting plate
- Screw mountable
- Stainless steel or nylon cable tie mountable (ties not included)
- Magnet and magnet spacer included
- Paintable plastic housing to match any surface

Item Weight	458 g
Package Dimensions	20.3 x 18 x 5.3 cm
Included Components	Product
Batteries Included	No
Batteries Required	No
Includes Rechargeable Battery	No
