BWG BW1280-F1 Sealed Lead-Acid Battery, 12V 8AH. This 12V 8Ah sealed lead acid battery is an AGM (absorbent glass mat), maintenance-free, valve regulated (VRLA), rechargeable battery. Able to be used with a wide variety of applications; it has a wide operating temperature, long service life, and deep discharge recovery. The key to this battery technology is the porous glass mat separators, which completely absorb and trap electrolyte (battery acid).
