

## Easy Updater Tool for Updating GC2 Panels

UPDV

SKU: 57218    UPC: 817082011370

Now you can quickly and easily update a GC2 panel or TS1 keypad without using a computer or incurring the OTA update charges from your backend service provider. The compact design of the Easy Updater fits in a technician™'s toolbox and ships with firmware already installed for instant use right out of the box. It is ideal for a tech who is updating a system from a 2G radio on previously installed panels. Just update the panel using the Easy Updater and replace the old radio.

### Kit Includes:

- Easy Updater for GC2 (English firmware preloaded)(1)
- 4-Pin Adapter for early TS1 production model

### Features

- 4-Position LED Display for easy status updates
- No batteries required, powered by the panel
- Micro USB Socket for firmware upgradeability
- 4-Pin Adapter for early TS1 production model
- Sounder for status change notifications
- Durable, compact enclosure
- Start button to initiate the GC2 or TS1 firmware upgrade™ LED to indicate correct cable connection
