

RadioRA 3 Outdoor Plug-in Switch

RR-15OUT-BL

SKU: 180320 UPC: 78427629729

The RadioRA 3 outdoor plug-in switch controls outdoor loads, both directly or wirelessly as part of a RadioRA 3 lighting control system (using Lutron patented Clear Connect ? Type A RF Technology). A solid core construction protects the internal electronics, so it is built to withstand severe weather, season after season. It is ideal for smart control of landscape and string lighting, holiday lights and inflatables, and some motors and pumps.

Features

- When used with the RadioRA 3 processor, the RadioRA 3 outdoor plug-in switch can be incorporated into lighting scenes, scheduled for daily events, and controlled from anywhere in the world.¹
- Lutron patented Clear Connect ? Type A RF Technology works through walls and floors.
- Works with 120 V~ outdoor lighting, motors and pumps, and outdoor lighting low-voltage transformers. See Load Types and Ratings for more details.
- The unit has been designed to withstand all weather conditions. The internal electronics are fully encapsulated to keep water, humidity, dust, and dirt from ever reaching or degrading the product electronics.
