

SONOS

Sub Mini Compact Subwoofer - Black

SUBM1US1BLK

SKU: 180024 UPC: 84013680403

Deepen the enjoyment of TV, music, and more with bold bass when you pair Sub Mini with Beam, Ray, One, or One SL.

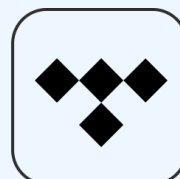

Place it anywhere in the room, breeze through setup with help from the Sonos app, and create richer, more immersive sound without any buzz.

Mini makes a big impact

Listeners feel more immersed in every scene and song with surprisingly rich, clear, and balanced low end.

Features

- More exhilarating home theater
Unlock the entertainment experience when you pair Sub Mini with Beam or Ray. The 5 GHz WiFi connection enhances audio transmission speed so one can enjoy movies, shows, and games with high-quality sound reliably synced with the TV.
- More mesmerizing music
Never miss a beat and hear more nuance in every note when you pair Sub Mini with One or One SL.
- Core power
Within the acoustically sealed cabinet, dual custom woofers generate the full-toned low frequencies of a much larger subwoofer. Advanced processing further enhances the bass response.
- No buzz or rattle
Both woofers face inward to create a force-canceling effect that neutralizes distortion.
- Better bass for the space
Trueplay™ tuning technology adapts the bass for the unique acoustics of the room so it never sounds harsh, muddy, or flat—even if you place Sub Mini next to the wall. *Supported iOS device required.
- Hides in plain sight
Elegant and compact, Sub Mini blends in beside the furniture and easily fits under a desk or table.
- Connects wirelessly
Sub Mini connects to the system over WiFi, so you can place it wherever it fits and looks best in the room.
- Plug, add, play
Just plug in the power cable, open the app, and follow a few simple instructions to add Sub Mini to the existing system.
- Easy control
The volume automatically adjusts along with the paired soundbar or speaker. Use the Sonos app to customize the EQ and change the bass level to any preference.

Control it all with the app
