

IQ Glassbreak Detector

QS1431-840

SKU: 66158 UPC: 854545006979

The IQ Glass is specially designed to protect you if an intruder tries to break-in through a window. Using our proprietary S-Line encryption technology, encrypts signals sent to the IQ Panel while still providing backwards compatibility for legacy 319.5 systems. Triggered by the pitch and frequency of breaking glass, the IQ Glass is effective within 20' and is activated automatically when you arm your IQ Panel in either Stay or Away mode. Typically installed on the opposite wall or on the ceiling to allow for better listening ability in large living areas.

Feature

- Encrypted S-Line sensor technology protects signals sent to the IQ Panel while still providing support for legacy 319.5 systems
- Actively listening for breaking glass frequencies when you are in stay or away modes
- Typically installed on the wall opposite the windows needing protection, or on the ceiling in a room with windows on multiple sides
- Protects widows within line of sight within 20'

Sensor	2.75"H x 3.88"W x 1.5"D
Sensing parameters	Maximum 25 feet
Mounting Spec	At least 3.3 feet from windows being protected, and 4 feet from sources of noise
Mounting hardware	#4 or #6 screws
Replacement Battery	CR123A 1550mAH (x2)
Temperature Range	14°F to 120°F
