## CONNECT PoE+ Adapter

72102

SKU: 181625    UPC: 04109372102

CONNECT PoE+ Adapter is the go-to solution for powering any iOS device in-wall. By drawing from a PoE+ power source, the PoE+ Adapter will ensure that any iOS device including iPad Pros will be adequately charged. Simply run a Cat 5 from a fully powered output of a compatible 802.3AT PoE+ Switch. Optionally, use IPORT's PoE+ Injector (iPort 72106 sold separately).

Use a Cat 5 or 6 cable terminated with an RJ-45 connector to connect the iPort PoE+ Adapter and connect the other end to a PoE+ Switch or PoE+ Injector.
