

Mini RPA Elite Projector Mount

RSMCUW

SKU: 181840 UPC: 841872119939

The Chief RSMCUW Mini RPA Elite Projector Mount builds on the foundation of the highly successful RPA Elite mount, offering a compact design and smaller form factor which supports the trend towards sophisticated technology in a small package. This universal mount is ideal for those who wish to use it with more than one brand or who anticipate changing projectors in the future.

Although 33% smaller than the RPA, these mini mounts maintain 100% of the functionality of the larger mount, with independent MicroZone adjustments and a 25 lb capacity. Centris Technology provides fingertip positioning capability which automatically adjusts to accommodate specific projector weights. Shipped fully assembled, the RSMCUW is also quick to connect or disconnect for lamp or filter changes via the Q-Lock Release Lever. Besides maintaining precise enough remounting to ensure that registration and preset adjustments remain unaffected, the lever integrates a "C" series key and lock.

Feature
