

Speaker Stand for Motion XT B100 and B10 Bookshelf Speakers

STAND25

SKU: 183199 UPC: 81012302617

This custom-designed stand provides a solid, anti-vibration platform for MartinLogan Motion XT B100 and Motion B10 speakers. It allows the speakers to perform their best, and places them at ideal listening height. There's a threaded insert on the bottom of each speaker that allows you to securely mount it on the stand.

For additional mass and stability, you can fill the stand's column with additional vibration-damping material, like sand or shot (not included). Rubber feet and metal spikes are both included for improved "grip" on a range of flooring surfaces. And the STAND25 comes with interchangeable visual accent pieces to match the look of your matching MartinLogan speakers.

Features

- Stand for MartinLogan Motion XT B100 and Motion B10 speakers
- Mounting holes in top plate let you attach the speaker securely
