

319.5 MHz Daughter Card for IQ4 NS

QC0001-840

SKU: 183399 UPC: 850037136575

The Qolsys IQ Card-319 is a daughter card for the IQ4 NS (no screen) alarm panel. It allows the IQ4 NS to support legacy 319.5 MHz wireless sensors. The IQ4 NS will support up to one (1) of these 319.5MHz cards, along with up to one (1) PowerG daughter card. If you need to add 319.5 MHz sensor support to your IQ4 NS, and there is an open legacy SRF slot, then this is the card you are looking for.

The IQ4 NS will offer many of the same great features as the IQ4 Hub minus the screen. It has built-in support for dual-path WIFI and has a Z-Wave Plus controller inside. The IQ4 NS does support Bluetooth disarming but does not support music streaming. The IQ4 NS does support full remote access and control through Alarm.com's interactive mobile app and the Alarm.com website. The Alarm.com mobile app is available on iOS and Android app stores. The IQ4 NS is a fully capable automation hub for your smart home. The IQ4 NS also doubles as a fully capable alarm system with support for your choice of wireless sensors.

Features

- Compatible with IQ4 NS Automation Only Panels
