

8" AS Series Surface Mount Speaker - Black

AS-8T-B

SKU: 183546

The AtlasIED AS-8T is a two-way compact Surface-Mount weather resistant loudspeaker boasting an exceptional performance-to-size ratio for demanding foreground & background applications where durability, modern, understated aesthetics, and outstanding sonic performance are prerequisites.

Featuring a high excursion, weather treated 8" woofer, seamlessly transitioning to a 1" exit compression driver, the AS-8T delivers a consistent and accurate broadband frequency response, both on and off axis. Available in textured black or white, the outstandingly durable and scuff resistant, high impact ABS enclosure with UV inhibitor is weather resistant (IP55), for consistent performance in adverse conditions, both indoors and out.

Safe and effective Installation of the AS-8T is made simple by way of the included slip free yoke mount, optional universal mount, or compatibility with 3rd party VESA mounts. Equipped with a low insertion loss 60W transformer for 70V or 100V distributed applications, wattage tap selection and low impedance bypass is easily configurable via a rear mounted slide selector switch with security cover. The AS-8T has been sonically matched with the wider range of AS Series models, this allows consistency in installations where there is a mix of products used.

Features

- Minimalistic and clean industrial design for sensitive architectural constraints
- Effective coverage for systems with space limitations
- Extremely consistent horizontal off axis performance
- Ultra-low insertion loss 60W transformer for dynamic performance in distributed systems
- High impact ABS enclosure with UV inhibitor
- IP55 rated
- Slip-Free yoke mount supplied. Optional pan and tilt bracket. Compatible with VESA™ mount
- Advanced tunings available via AtlasIED Atmosphere DSP platform
