

RG6 CATV 3GHz 60% AL Braid 1000'
Box - White

RG6/U-BC-WT

SKU: 72889

SCP RG6/U BC Coax cables have an 18 AWG solid bare copper center conductor surrounded by a foam polyethylene dielectric. A bonded aluminum foil and 60% aluminum braid provide 100% shield coverage. SCP RG6/U BC Coax cables are swept tested to 3 GHz to ensure performance at applicable frequencies. Each RG6/U Coax cable also has SCP's industry favored Cable Labeling System with sequential foot markings and room/zone/outlet designations. The SCP RG6/U BC Coax cables are also available with a Messenger (RG6/U-BC-MES) and in a Siamese (bonded side by side) configuration (such as our RG6/U-S-BC) and in a Siamese with Messenger configuration (RG6/U-S-BC-MES). These Coax cables are available in several different packaging options with a Black or White PVC jacket. These RG6/U cables are UL listed and CM rated.
