## EB-PU2120W 20,000-Lumen 3LCD Laser Projector with 4K Enhancement

V11HA63920

SKU: 183727    UPC: 10343968929

Experience the power and flexibility of the EB-PU2120W large venue laser projector. This 20,000-lumen projector is incredibly compact, lightweight and energy efficient. The EB-PU2120W features Full HD WUXGA resolution with 4K Enhancement Technology<sup>1</sup> to produce ultra bright images.

The EB-PU2120W uses a 20,000-hour virtually maintenance-free laser light source. It also features a hermetically sealed optical engine for high dust resistance and a filterless cabinet for low-maintenance operation.

The projector pairs with 9 optional powered lenses (sold separately) to simplify installation and includes a host of premium features for fast setup, such as built-in NFC functionality, and the optional attachable PixAlign camera to streamline multi-projector setups.

### Features?

- **Fast installation** — built-in NFC functionality and easy-to-use Android™ and iOS mobile app, Epson Projector Configuration Tool (EPCT), to streamline multi-projector installations
- **Optional attachable PixAlign camera** — provides access to powerful features, including projector stacking assist function, blending assist for edge blends, color calibration and screen matching from the projector menu or Epson Projector Professional Tool (EPPT) app
- **Simple Blending and Simple Stacking functions** — for fast blending or stacking of two projectors using a remote controller instead of conventional setup with a PC and router; requires optional attachable PixAlign camera
- **Efficient setup and management** — control multiple projectors in a single, large space with EPPT app; easily manage your installed inventory using Epson Projector Management – Connected (EPM-C) from any device with a Web browser
- **Supports limited 120 V operation** — to facilitate initial configuration and display setup prior to connecting to 200-240 V power source for full brightness
