

Pro 2 Key Free Touchscreen Keypad Lock, Bluetooth with Wi-Fi Connect Bridge - Black Suede

YRD654-CB1-BSP

SKU: 187733 UPC: 08102312763

Modernize your front door with the Yale Pro 2 Key Free Touchscreen Keypad Lock, Bluetooth with Wi-Fi Connect Bridge. This Bluetooth compatible smart lock replaces your existing lock and deadbolt to add style, security, and peace of mind to your entry door through 3 key-free access options: entering a 4-8 digit passcode into the touchscreen keypad, Auto Unlock & Auto Lock via proximity detection, or remotely accessing the lock through the Yale Access app when within Bluetooth range. You can check on the lock's real time status, receive alerts when the lock is used, and decide who can unlock your door and when through the Yale Access app. Additional features include battery backup support, Apple Homekit compatibility, voice control via Siri, and IPX5 Coastal Grade Rating and 90 Minute Fire Rating which ensure the lock can continue to operate during rainy weather or in fire related emergencies. Included with this Bluetooth smart lock is the Yale Connect Wi-Fi Bridge, a plug-in connectivity module that connects any nearby Yale Bluetooth lock to the Internet via your Wi-Fi network to enable remote access with the Yale Access app without requiring a Yale Smart Module.

Features

- Bluetooth smart lock with touchscreen keypad offers multiple key-free and remote access options to unlock your front door
- Yale Connect Wi-Fi Bridge connects compatible Bluetooth Yale Locks to the Internet via Wi-Fi
- 3 ways to unlock: 4-8 digit passcode, Auto-Unlock via proximity and remote access through the Yale Access app
- Included DoorSense Sensor reports lock and door status and enables Auto-Unlock/Auto-Lock when entering or leaving Bluetooth proximity
- Share passcodes with guests, friends, and family and schedule days and time periods when passcodes can be used
- IPX5 Coast Rating and Fire Rated for up to 90 minutes ensures reliable performance in inclement weather and fire emergencies
- Compatible with most left and right handed US and Canada doors
- Two-factor authentication and fingerprint resistant keypad ensure access to your door is kept within your control
- Voice Control Compatible with Amazon Alexa, Apple Siri, Google Home
- Smart home integration with Apple HomeKit and select Bluetooth compatible hubs
