

## Pro 2 Keypad with Wi-Fi + Connect Bridge - Black Suede

YRD614-CB1-BSP

SKU: 187721

With multiple ways to unlock, the ability to easily share and track entry codes and advanced Auto-Lock with DoorSense(R), this Wi-Fi smart lock gives you one less thing to worry about. With a Yale Connect Wi-Fi Bridge included, you can easily check that the door is locked, see if the dog walker came on time and receive a notification when the kids get home from school when you're away from home, using the Yale Access App. Plus, enjoy extended battery life for your smart lock.

### Features

- Everyone that needs access can choose their own way to unlock, whether it's the keypad, voice assistant or Auto-Unlock
- Never worry again about remembering to lock the door; Yale can be set to Auto-Lock once DoorSense detects that the door is closed
- We know that even when you're not home, it's still on your mind, and your to-do list; lock-up, let someone in, receive notifications and share access from anywhere using the Yale Access App
- Share unlimited codes with family, friends, and service people for simple, trackable access to your home, using the Yale Access App, so you'll never hide a key again
- For those times when your hands are full, Yale can get the door as you get home; with optional Auto-Unlock, you won't need to touch the lock, or your phone
- With a Yale Connect Wi-Fi Bridge included, enjoy app access from anywhere and extended battery life for your smart lock; simply plug it into a power outlet, and connect to your home's Wi-Fi in minutes
- 2-Factor Authentication and matte keypads for fingerprint resistance provide extra peace of mind; so, you know only the right people have access at the right time; comes with a 90 minute fire rating and is ANSI/BHMA Grade 2 certified
- Easily manage the lock along with your smart lighting, speakers, thermostats and more, all from the Apple Home app or using Siri; access remotely when you have an Apple TV, iPad or HomePod set up as a hub
- Don't get off the couch or pick up your phone, simply ask your voice assistant to unlock your door using Amazon Alexa, Hey Google or Siri
- When you're not home, track who and when people come and go through the app's activity feed, or with app notifications
