

SONANCE

VX66 6" Rectangle In-Wall Speaker Pair

96004

SKU: 188092    UPC: 041093960048

Expertly engineered for superior performance, finish, installation, and above all, experience. Visual Experience Series includes the all-new Sonance VX and James VXQ architectural speakers, leveraging the latest technological advances to reimagine driver, tweeter, and crossover design.

Sonance VX speakers are engineered for maximum coverage and fidelity to create the most crisp, consistent experience possible. Sonance Sinusoidal Textured Waveguide provides the greatest dispersion possible so that everyone in the surrounding space receives the same experience, making it easier to design even, balanced audio systems. The James VXQ Level 8 models, feature a uniquely engineered Quadratch Tweeter and Cymatic Diffuser to create crisp details and exceptional dispersion. Each VXQ Quadratch Tweeter was designed using iterative machine learning to create the ideal experience for each speaker size, a customized feature unique to each.
