

SONANCE

## VX82 8" Rectangle In-Wall Speaker Pair

96006

SKU: 188158    UPC: 041093960062

Expertly engineered for superior performance, finish, installation, and above all, experience. Visual Experience Series includes the all-new Sonance VX and James VXQ architectural speakers, leveraging the latest technological advances to reimagine driver, tweeter, and crossover design.

Sonance VX speakers are engineered for maximum coverage and fidelity to create the most crisp, consistent experience possible. Sonance Sinusoidal Textured Waveguide provides the greatest dispersion possible so that everyone in the surrounding space receives the same experience, making it easier to design even, balanced audio systems.

Sonance VX and James VXQ feature an all-new grille design with flexibility to upgrade to a variety of aesthetics. The Sonance Micro Trim grille is the standard grille for all VX models. The grille is a new brilliant white with an ultra-sleek bezel around the edge that is 50% slimmer than legacy VP grilles. Optionally, Visual Experience speakers can be finished with a Trimless grille, ordered separately. The completely borderless grille provides a clean and minimalistic finish that sits just proud of the surface. To take it a step further, leverage Sonance TRUFIG Mounting Platform and VX Trimless grille to precisely position and flush mount any Visual Experience speaker.

### Features

- Sold As Pair
- 1.2" Tweeter With Acoustic Back Chamber
