

VISTA H Zone Expansion Module

VISTAHEXPHW

SKU: 189085 UPC: 194160015261

The VISTAHEXPHW hardwired zone expansion module allows you to add 8 additional hardwired zones (16 with zone doubling) per module to a VISTA H system. The module has a built-in tamper allowing detection and reporting if the front cover is removed and is supervised so if the wiring is cut a supervision alarm will result indicating the module may not be operational. The flexibility to mount the module on a surface wall or to a gang box depending on the installation environment and the terminal strips are removeable to give installers easier access to help making wiring easier.

Features

- 8 Hard wired zones per module
- Supports normally open, normally closed, double balanced, zone doubling and End of line resistors type
- Power supply regulation on board
- Loop Response Time 400ms
- Required Loop Resistance 2K ohm
- Operating Temperature 32 to 122 F, 0 to 50 C
