

JASCO

## Pro Series Under-Eave Light Power Supply - White

84432

SKU: 189366

Take your outdoor lighting display to a new level with the JascoPro Under-Eave Lights Power Supply. Specifically designed for JascoPro Wi-Fi Under-Eave Lights (sold separately), the power supply increases your plug-in options. Clips and screws are included for secure placement when adding versatility to your lighting display. The power supply is rated for 92W and allows connection to a second outlet when more than the maximum length of your under-eave lights is needed.

UV resistant, weatherproof and rated for permanent use, JascoPro under-eave lights offer reliable, long-term installation. Perfect for every holiday, event or season, enjoy endless color combinations, dynamic modes, customizable effects and more through the JascoPro app. The strands easily mount on your eaves, fascia, pergola, patio, balcony and more. Its discreet LED pucks are virtually invisible when installed and perfectly illuminate your home. For increased versatility, connect strands or extensions up to 99ft./108 lights. The last light strand of the set is also cuttable to truly personalize your display.

### Features

- Power Supply Only — Rated for 92W to power and control your JascoPro Wi-Fi Under-Eave Lights (sold separately)
- Specific Design — The power supply is directly compatible with JascoPro Wi-Fi Under-Eave Lights sets to increase plug-in options when more than the maximum length of lights is needed
- Sold Separately — JascoPro Wi-Fi Under-Eave Lights string lights and extension cables are required to be purchased separately
- Permanent Lights — Provides an additional power source to accommodate larger coverage areas or is an exact replacement for the power supply included in JascoPro Under-Wave Light sets
- Total Coverage — Power supply supports light strands and extensions linked to a maximum length of 99ft./108 pucks
