

Omada Pro Hardware Controller

C5300

SKU: 189435 UPC: 810142821377

C5300, the Omada Pro professional on-premises hardware controller, provides 100% centralized management of Omada Pro devices. C5300 supports centralized management of up to 100 Omada Pro access points, 20 Omada Pro switches, and 10 Omada Pro routers—all controlled from a single interface. There is no need to run a PC/server, making network management simple and efficient.

Featuring hybrid cloud technology, the Omada Pro hardware controller C5300 allows you to remotely control the whole network via the Omada app or web portal, wherever you are in the world with cloud access. Locally manage devices with the ultimate security and stability. C5300 is equipped with 2× Gigabit RJ45 ports for high-speed networking and 1× USB 3.0 port for auto-backup. With the latest chipset, the C5300 has enough processing power to support the massive management of your business network. Rackmount/desktop design benefits easier and more flexible installation.

The easy-to-use dashboard makes it easy to see your real-time network status; check network usage and traffic distribution; receive network condition logs, abnormal event warnings, and notifications; or even track key data for better business results. Network topology helps IT administrators quickly see and troubleshoot connections at a glance.

Features

- High-Performance Centralized Management: Up to 100 Omada Pro APs, 20 Omada Pro switches, 10 Omada Pro routers
- Industry-Leading Hardware Design: 2× Gigabit RJ45 Ports and 1× USB 3.0 Ports
- Free cloud access with the Omada app or Web UI from anywhere, anytime
- On-premises manages to locally monitor and manage devices
- The easy-to-use dashboard and real-time network topology make network monitoring easy.
- Batch and multi-site management benefit network maintenance
